Abstract. The abstract should briefly summarize the contents of the paper in 15–250 words.

Keywords: Program Synthesis · Web Development · User Interface

1 Introduction

2 Background

3 Related work

4 Illustrative example

5 Formal problem definition

6 Algorithm

First we divide the rectangles into section based on their y-axis. Then we use greedy to find the earlist possible cut y such that this y does not divide any other rects.

7 Evaluation

8 Conclusion
